問題V 次の文章について設問に答えよ。解答番号は ~

Have you ever wondered why people around the world speak different languages? The Bible tells us that, at first, all the people of the world had only one language and used the same words. Those people were the descendants of Noah and of his three sons: Shem, Ham, and Japheth.¹

the population grew and spread, they came to a plain² in Babylonia³ and settled there. The plain soon filled with people. These people began to talk about a great city with a tower that reached all the way to heaven. They wanted to show that they were important, and so the tower they were planning to build was to be a monument to themselves that would last . They made bricks and baked them hard, and they had the ideal building material to hold them together.

God could see the pride⁴ of the people as they built their city and tower. He knew that they were becoming too self-important⁵. In order to make the people realize that they were not as great as they thought, God decided to remove their power to communicate by mixing up the language, and scattered⁶ them all over the earth.

Now that they were unable to with each other, the building of the city called Babel ended. The meaning of Babel is “confusion” and confusion ruled when God gave them many languages. Human pride had made the builders of the tower think that they could with God, and it had led to their fall.
